

Intelligent Document Solution Empowers Brokers To Offer Electronic Benefits Enrollment To Every Mid-Market Client

Viga Technologies has designed and built the first electronic benefits enrollment solution based upon the Adobe Intelligent Document Platform. i-enroller is simple, easy to implement, inexpensive, and focused on the unique perspective of benefits consultants and brokers.

Atlanta, Georgia (PRWEB) September 23, 2005 -- Viga Technologies is pleased to announce the commercial launch of i-enroller, the latest offering from Cadré Consulting Group. Viga is the exclusive technology provider behind i-enroller, the first benefits enrollment solution based upon the Adobe Intelligent Document Platform.

Cadré Consulting Group engaged Viga Technologies to design and build an electronic benefits enrollment solution that is simple, easy to implement, inexpensive, and focused on the unique perspective of benefits consultants and brokers. Brokers now have an alternative to the long set-up times and high expense of web-only enrollment solutions. Using i-enroller, a broker is ready to conduct Open Enrollment using a choice of multi-carrier, multi-benefit enrollment forms customized for their client in less than an hour. i-enroller creates an “Intelligent Document” enrollment form, a web-based form, and a “paper” form for those employees who do not have access to technology.

The i-enroller “Intelligent Document” combines the familiar look and feel of a PDF form with the power of data collection using Extensible Markup Language (XML). Brokers and Employers can now securely collect enrollment information electronically and provide that information to the appropriate benefit carriers and administrators without the significant expense associated with paper forms. This choice of enrollment alternatives translates into widespread applicability in the middle market. The i-enroller Case Dashboard provides a unified real-time management tool for brokers and their clients to efficiently manage the open enrollment process. Add to the mix the low-cost infrastructure architected by Viga Technologies and i-enroller overcomes all of the obstacles to offering electronic benefits enrollment to every mid-market client.

“Viga Technologies' industry-leading experience with interactive PDF technology allowed our team to focus on the specific needs of brokers. We have now eliminated the obstacles to offering electronic enrollment for every mid-market company. Brokers have told us they intend to use i-enroller for every one of their clients,” commented Phil Wasden, Cadré's Chief Operating Officer.

About Viga Technologies, Inc.:

Viga Technologies designs, builds, and operates intelligent document solutions which increase the efficiency and effectiveness of document-centric processes for the health care industry. Viga employs Lean Six Sigma methodology to rapidly understand existing business processes from a variety of stakeholder perspectives, designing solutions which can be quickly developed, rapidly adopted and continuously improved upon. A member of the Adobe Solutions Network, Viga combines its own proprietary technology with that of Adobe to deliver leading-edge solutions to its customers.
